About Us

At **EcoVille**, we believe that *sustainability* should be at the forefront of every business decision. That's why we offer a range of *high-quality, eco-friendly disposable products* that are designed to *reduce waste* and minimize the impact on the environment.

Our products are made from natural and renewable materials, such as cornstarch, sugarcane, and bamboo, which are *fully biodegradable and compostable*. Unlike traditional plastic products that can take hundreds of years to decompose, our products break down quickly and safely, leaving behind no harmful residue or microplastics.

Whether you're looking for *disposable cutlery, plates, bowls, cups, or packaging*, we have a wide range of options to suit your needs.

Our *products are perfect for parties, events, restaurants, food trucks, and any other situation* where disposable products are necessary.

In addition to being environmentally friendly, our products are also *durable, affordable, and convenient*. We believe that you shouldn't have to sacrifice quality or convenience to be sustainable, which is why we've created products that are both practical and eco-friendly.

At **EcoVille**, we're committed to making a positive impact on the environment and helping our customers do the same. If you're looking for high-quality, sustainable disposable products, **look no further than EcoVille**.

100% Compostable & Biodegradable Tableware

REDUCE USE CYCLE RESPECT

Reduce: The first principle of sustainability is to reduce the amount of waste we produce. Biodegradable products can help in this regard by reducing the amount of non-biodegradable waste that is generated.

Reuse: The second principle of sustainability is to reuse products as much as possible. Biodegradable products can be designed with this in mind, such as reusable biodegradable bags or biodegradable food containers that can be composted and turned into fertilizer.

Recycle: The third principle of sustainability is to recycle as much as possible. While biodegradable products can't necessarily be recycled in the traditional sense, they can be composted and used to enrich soil.

Respect: The fourth principle of sustainability is to respect the natural environment and ecosystems. Biodegradable products can help to achieve this by reducing the amount of pollution and waste that is generated, and by returning nutrients to the soil through composting.

No Plastic Only Green Choice

Products are made from 100% plant material such as sugarcane and bamboo waste, which does not contain any toxic material and it is also oil and water resistance

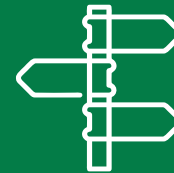

Microwave Safe

Products are microwave safe which means it can be used in microwave or it oven between temperature -20°C to $+140^{\circ}\text{C}$

Trust

Every product is accounted for on specs in piece and in packaging. This is done to ensure we never fail shout on our commitment.

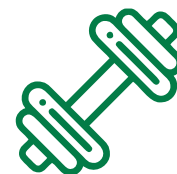

Best alternative for plastic

Products are biodegradable that work great for all occasions! ideal for banquets, barbeques, parties and more. Everyday products you need at prices you want.

Biodegradable & Compostable

All products are made from renewable resources. All products are Chemical Free.

Heavy Duty

Products are designed to be light weight and durable. Ergonomics design of our product feel more comfortable and gripper while holding in hands and we make it thicker, so it does nor break easily in takeaway or delivery
